

COURSE SYLLABUS

Site Plant/Vehicle Safety Awareness

Suitable For:

All personnel on work sites

Course Aim:

This course is designed to promote a safe working environment by providing candidates with a general knowledge and understanding of on-site plant/vehicle operations and manoeuvring by both the operator and site personnel.

Course Content will include:

- Brief overview of the law – Current regulations & legislation, with specific regard to site plant/vehicle safety
- Internal company policies for plant/vehicle safety on-site
- Roles and responsibilities of the plant/vehicle operators and other site personnel
- Common hazards relating to plant/vehicle movements and use on-site
- Awareness of potential hazards involving other site personnel, vehicles or plant
- Visual safety checks before and during operational use and movement of plant/vehicles on-site
- Safe systems of work, including safety zones
- Understanding and confirming hand signals for plant/vehicle operations and movement
- Personal Protective Equipment (PPE)

The course is a mixture of theory and practical training / exercises.

Course Objectives:

On successful completion of this course, candidates will be able to:

- Understand current relevant legislation
- Identify the hazards and precautions to take when carrying out plant/vehicle operations and movements in the workplace (with regard to the operator and other on-site personnel)
- Put in place or adhere to existing procedures and safe systems of work

Venue: Either on-site at clients' premises or at ITS Training Centre

Duration: Half Day

Candidates: Up to 6 per course

Certification: ITS Certification
